CONTENTS

Part I ..... Naval Reserve.
Part II ..... Naval Reserve Retired.

NOTES

1. The date shown in column headed "Pay Entry Base Date" is the date which reflects all service for pay purposes.

2. Attention is invited to the fact that in all communications concerning officers, the file number is used, not the register number.

3. The information published in this register is that contained in Bureau of Naval Personnel punched card records. Errors or omissions should be reported by letter to the Chief of Naval Personnel by the Naval Reserve officer concerned.

4. An asterisk appearing at the left of the register number denotes the officer concerned has been appointed, or is eligible for appointment, to the next higher grade but has not, at the time of publication, accepted the appointment. All appointments, except permanent appointments of officers to the same grade once temporarily held, made prior to 1 July 1950 terminate on 1 July 1953 if not accepted. All appointments made subsequent to 1 July 1950 terminate by their own terms one year from the date made if not accepted. The register number reflects relative precedence in the higher grade in such instances; however, officers whose appointments to a higher grade have terminated may be reappointed to the higher grade with appropriate later precedence consistent with the delay in establishing professional qualification, as provided in BUPERS RESERVE INSTRUCTION 1412.1.

5. Register numbers of officers who are entitled to ranks indicated, solely by virtue of Public Law 305, Seventy-ninth Congress, commence with 900,000 in each grade of the line and staff corps.

6. Register numbers of ensigns with dates of rank in the year 1953 and lieutenants (junior grade) in the staff corps with dates of rank in the year 1953 are purposely omitted pending establishment of relative precedence. Register numbers are not assigned ensigns with designator 1135.

TABLE OF OFFICER DESIGNATORS

1. Officers are assigned a 4-digit numeric designator for accounting and statistical purposes. The first three digits indicate the general category for which the officer is designated, and the fourth digit indicates the officer's official status. Designators (tabulation of first 3 digits and translation of the fourth digit) currently in effect are as follows (designator codes 170–179 inclusive, 370, and 570 are not included since the Naval Reserve has no category of officers corresponding to the Regular Navy Limited Duty Officer):
